

# ADD Damping – Subtract Vibrations

Active Damping Devices Remove Vibrations from Your Machine

– Quick, Easy, Inexpensive

## Benefit from ADD!

- ADDs can be fixed on existing machine or device
- No design changes or structural modifications needed
- Light: ADDs do not need big mass to work
- Immediate effect
- No structural identification of machine necessary
- Broad band effect on multiple resonances / harmonics
- Applicable with any mechanical system: Machine, device or installation
- Quick test can easily be performed with our off-the-shelf devices

Machine tools

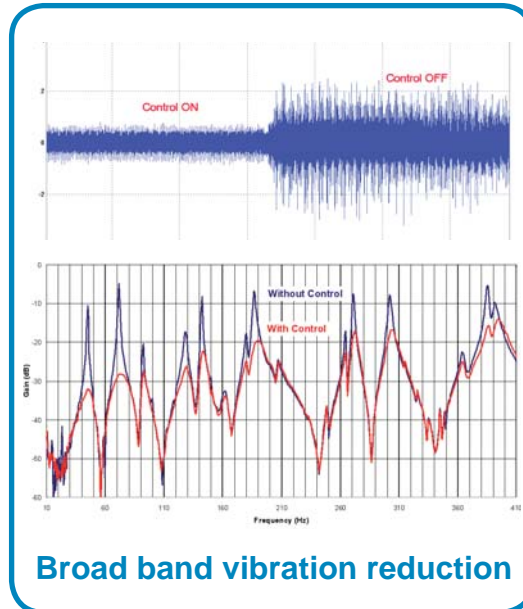

Pipes

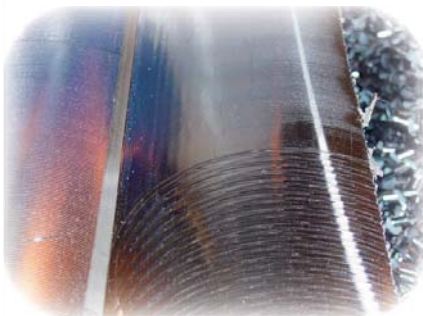

Wind turbines

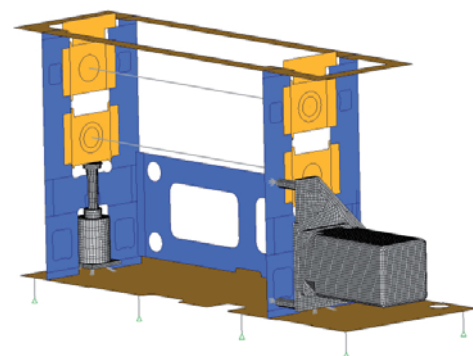

Microlithography machines

Chatter and instabilities

Processing machines

### We Provide Your Turn-Key ADD-Solution!

- Diagnostic Measurement: Characterization and quantification of your vibration situation provides the base for selection of an appropriate ADD
- Performance Test with our off-the-shelf ADDs
- Commissioning of optimal standard or custom ADD-components: focused on quick, effective and inexpensive vibration reduction
- Production, delivery and implementation of your ADD-solution: When we leave, we take vibrations with us ...
- Contact us: your vibration problem might be solved in one week!
