SMART CITIES – SMARTER VIBRATION MONITORING

Galloping urbanization, new infrastructure projects in crowded locations, plethoric transportation modes, challenging construction works, tunneling and demolition sites, are now more and more instrumented in so called smart cities environments. This also brings unrivalled challenges to civil and structural engineering works and requires lots of sensor data for situation assessment in real time.

These multiple sources of vibrations, root causes to human disturbances or potential structural damages, are extensively monitored to ensure acceptable levels for people nuisances mitigation, risk management and assets sustainability.

BARTEC SYSCOM recognizes these needs and address them in this brochure with an innovative vibration compliance solution, redeemed possible with the latest available and proven technologies driven by IoT low power integrated components and new LTE communication networks.

Envision this new generation of autonomous motion recorders providing affordable sensors, cable free installation, smart & sleek monitoring services for structural health monitoring and human comfort evaluation.

Discover the BARTEC SYSCOM vibration compliance solution in this brochure and find our why you need it!

KEYSTONE CONCEPT – BARTEC SYSCOM VIBRATION COMPLIANCE SOLUTION

The new BARTEC SYSCOM vibration compliance solution articulates two indissociable items:

- Hardware: **ROCK**, an autonomous vibration monitoring device tailored for field monitoring challenges and related constraints
- Software: **Syscom Cloud Software (SCS)**, a solution for dynamic measurements monitoring, data processing, remote parametrization, alarming and reporting.

This new and fully integrated concept for vibration compliance, called **KEYSTONE**, features the following:

- All-in-one vibration monitoring solution, compliant to worldwide regulations. Simply select the proper standard and get notified if an alarm level is exceeded
- Painless site installation with devices operability in a cable free manner, autonomously with its embedded battery and ultra low power design
- Permanent monitoring through remote parametrization granted through the SCS cloud solution
- No initial capital, nor amortization required, thanks to a pay per use concept, with monthly flat fee, providing total cost control
- Local expertise and quick delivery through specialized distribution network

BARTEC SYSCOM is launching a prime service to achieve best assets safety and risk mitigation, aligned with globally enforced regulations.

KEYSTONE is the most reliable and easiest to use vibration monitoring solution available on the market !

MAIN FEATURES SYSCOM ROCK & SCS

Hardware features:

Software features:

SCS <http://scs.bartec-syscom.com>

- Easily operated
- Multi-platform cloud based access
- Smart notifications and alarming (SMS & Emails)
- Automated reporting
- Management by projects
- Remote parametrization and data access
- Compliance to major vibration standards
- Open data export and FTP push features

Remote permanent vibration monitoring solution in near real time for best efficiency and affordability. Discover how:

PLACE & PLAY

No recurrent site visit with remote parametrization and permanent monitoring. State of health (with test-pulse) and system metrics also monitored. Lowest cost of ownership

CABLE FREE

No site cable laying, nor additional battery or heavy solar panel installation due to ROCK extended autonomy

EASY PROCESSING

Like an app, webapplication on the cloud, easy to use, multi platform

SAFE DATA & EASY SHARING

Data backup on a Swiss server, FTP push feature, URL sharing and data conversion to ASCII in one click

AUTOMATED NORM COMPLIANCE

With periodic reporting. Non exhaustive country regulation list:

- Australia AS2187-2
- Austria ÖNORM S 9020
- France Circulaire du 23/07/1986, arrêté de 1994, SNCF IN1226
- Germany DIN4150-2, DIN4150-3
- Norway NS8176, NS8141
- Portugal NP2074
- Spain UNE22-381
- Sweden SS 4604866, SS025211, SS4604861
- Switzerland SN640312
- United Kingdom BS5228, BS7385-2
- USA RI8507, OSMRE, ISEE (vibration only)
- Italy UNI 9916
- The Netherland SBR A, B
- User defined limits

CONCEPT KEYSTONE -

HOW CAN YOU GET YOUR SYSCOM ROCK ?

- A) Request your ROCK device from our local partner. Just connect to the below link and fill in the required form. Our specialized partner will get back to you shortly and provide devices quickly from a local warehouse.

<https://rock.syscom.ch>

- B) Create your own free account on the SCS in just two minutes. The requested ROCK will be linked to your account automatically by our partner.

<https://scs.bartec-syscom.com>

- C) Receive the ROCK, install it on site in a cable free manner and just switch it on. That's it...you will automatically get the data uploaded to your SCS account in no time.

YOUR COMPETITIVE ADVANTAGES:

- Dedicated vibration compliance solution, including hardware and software
- Pay per use
- No Capex, no amortization, only Opex
- Total cost control, all included in a monthly flat fee, no hidden costs
- Local specialized partners
- Very short lead time
- Devices always up to date, with latest firmware, functionalities, best accuracy & reliability
- Free calibration included (ROCK need to be returned to our local partner)

Structural vibrations and human exposure to them are simply evaluated using ROCK devices and SCS data processing software.

The solution outputs are: automated reporting, quick alarming and easy data sharing (FTP, URL or ASCII files).

BARTEC SYSCOM

SYSCOM Instruments SA is a subsidiary of BARTEC GROUP, a multinational manufacturer of industrial safety equipment. SYSCOM Instruments SA is a leading provider of vibration and seismic monitoring equipment for civil engineering, strong-motion monitoring and safety related markets, especially for NPP and LNG plants. SYSCOM Instruments SA reputation rests on the reliability of its products, coming from a meticulous control of every design and production aspects. SYSCOM Swiss facility, fully ISO9001 certified, utilizes modern, automated production and test equipment to assure cost-competitiveness and high quality products.
